

FlexFund

Give Your Customers the Option to Pay for Their Inspection at Closing

HOW IT WORKS

1. Pay-At-Close option is offered to your customer at no charge
2. Customer provides title company information and a credit card as backup
3. Inspection marked as paid. Report is unlocked and sent to your customer
4. Customer pays for inspection at closing

WHY IT WORKS

1. Gives Your Customers Options: Flex Fund gives the customer the option to push payment until other closing costs are paid. This allows the customer to feel more comfortable during their home-buying journey.
2. Reduces Stress: Pushing inspection payments gives more time for financial planning and helps to reduce the stress during the buying process.
3. Make the Inspection Conversation Easier: FlexFund gives them the option to pay for it later instead of at the time of service.
